# Web Analytics — Past 28 Days

GA4-style dashboard report • Sample portfolio project • 10 Nov – 7 Dec 2025

| TOTAL USERS | CONVERSIONS | CONV. RATE WEB | CONV. RATE APP | ENGAGEMENT APP |
|---|---|---|---|---|
| 205,900 | 2,145 | 0.97% | 1.15% | 55.2% |

## Key Insights & Recommendations

- **Growing audience:** 205,900 users (+11.7% vs previous 28 days); conversions grew faster at +435 — quality of traffic is improving, not just volume.
- **App users are worth more:** they convert at 1.15% vs 0.97% on Web and engage at 55.2% vs 50.8%. A Web-to-App prompt for repeat visitors is the cheapest win in this data.
- **Buy on Web, upgrade in App:** purchases 744 Web vs 84 App; upgrades 621 App vs 327 Web. Match the call-to-action to the platform.
- **Timing:** weekend users dip 48%. Schedule launches and email sends Tue–Thu (best day: Mon 24 Nov, 9,632 users).

## Method

GA4-style daily data cleaned with Python (pandas) and modelled in Excel with live-formula KPIs. The matching workbook (Dashboard, Data, Insights) accompanies this report; the dashboard image in the portfolio replicates GA4's card layout.

Sample portfolio project built on sample data to demonstrate the service. Client data is kept confidential and never reused.
